What is Medic-Call?

Medic-Call, for doctor's surgeries, delivers a family of communications solutions that are tailored specifically for General Practice services. Developed by British based voice specialists, Splice.com, Medic-Call satisfies the needs of both the Practice team and the increasing service demands of central NHS and Government.

The phone remains the primary method of communication for a surgery and its patients. With the need for extended opening hours, patient phone triage and some surgeries amalgamating, the phone system can be a burden or a blessing.

Medic-Call delivers a range of voice solutions that either enhance or if necessary, replace your current phone system, enabling you to deliver your services, exactly as you wish to, with ease.

Key Features of Medic-Call
